What is a car inverter converter?

?Anti-interference Pure Sine Wave Inverter? The car inverter converter adopts pure sine wave technology, which has low interference, low noise and large load capacity, it is a voltage converter that converts 12V /24V /48V /60V /72V DC into 110V/120V/220V/230V/240V AC. It can be used in emergencies, camping, cars, homes, RVs and solar energy.

Do I need to select the output voltage for my inverter?

A2: The output voltage is the US standard voltage 110V~120V (default). You do not need to select the output voltage, only select the input voltage. Of course, if you need an inverter with an output voltage of 220V, please let us know by email.

Which Inverter should I Choose?

If your applications are inductive loads, please choose the inverter whose continuous power is 3-7 times higher than the Watts of your appliances. If you want to power up to one refrigerator, we suggest you use 10 times higher power inverter. 4. Please turn off the load first then turn off the inverter.

How do I use the inverter Wizard software?

Using the free to download 'Inverter Wizard' software, the user can select output frequency, output voltage, and low voltage shutdown parameters from any Windows laptop through the standard micro-USB interface. This port can also be used to monitor and log input and output voltages, output power and inverter temperature
