

Are China Communications base stations shared

How many 5G base stations are there in China?

With 4.19 million 5G base stations already operational across China, the MIIT emphasized that "promoting 5G revolution and 6G innovation will be one of the priorities" for 2025, according to a report by Chinese newspaper China Daily. Chinese main operators are China Mobile, China Telecom and China Unicom.

How many 5G base stations are there in 2021?

As of October 2021, China Telecom and China Unicom had commercially deployed more than 600,000 shared 5G base stations, accounting for more than 40 percent of the world's 5G bases. China Mobile had built more than 500,000 5G base stations by the end of June 2021, ranking first in the world.

Will China Telecom and China Unicom build their own 5G networks?

On top of that, the two companies will build their own separate 5G networks in other parts of the country. China Telecom's own network will extend to 19 provinces, while China Unicom's will cover 10.

Who are China Mobile & China Broadcasting Network (CBN)?

The two operators, together with China Mobile, the world's largest mobile operator by subscriber numbers, and China Broadcasting Network Corporation Ltd, were all awarded 5G licences in June, well ahead of what the industry had expected. Wei leads the Telecoms.com Intelligence function.

Will China and China build 5G networks together?

According to the Agreement, the two operators, by sharing the radio spectrums to their names, will "build together" and "share together" one 5G radio access network in 15 major cities, including Beijing, Shanghai, Shenzhen, Guangzhou, etc. The 5G core networks will be built separately.

Who are China's 5G operators?

Chinese main operators are China Mobile, China Telecom and China Unicom. In addition to its expected expansion in the 5G field, China noted that it is also set to begin trials for 10-gigabit optical networks and enhance computing power infrastructure, reflecting the growing demand for artificial intelligence (AI) technologies.

With 4.19 million 5G base stations already in operation, the industry regulator said that "promoting 5G revolution and 6G innovation will be one of the priorities" next year.
