What is Communications in Barbados?

Communications in Barbados refer to the telephony, internet, postal, radio, and television systems of Barbados. Barbados has long been an informational and communications centre in the Caribbean region. The telephony, internet, and postal systems have good and reliable electricity coverage throughout Barbados.

How did Barbados communicate?

People in Barbados had various forms of communication as early as the 1840s. Some of the earliest expressions of inter-island communication included a number of signal stations built along the high points of the island to relay messages towards the Saint Ann's Garrison on the south-west coast. This method was used to transmit acts of transgression towards the island.
