

How much does a PV module cost in China?

According to price analysis firm InfoLink: "Since March, the spot price of n-type modules in China has soared from RMB0.7/W to RMB0.73/W. Quotes from leading manufacturers are approaching the RMB0.75/W mark." The results of the China Datang Group's 2025-2026 PV module framework. Image: Datang.

How much will PV modules cost in 2025?

On 11 March 2025, the results of the China Datang Group's 2025-2026 PV module framework purchase tender were announced, with the spot price of n-type modules increasing from RMB0.7/W (US\$0.097/W) to RMB0.73/W (US\$0.1/W), and some modules priced as high as RMB0.75/W (US\$0.11/W).

Why are PV module prices rising?

As we can see, in major tenders by PV utilities such as China Huadian Corporation and China Resources, manufacturers significantly raised their offers, further reinforcing the upward momentum in module prices.

In 2025, China launches a photovoltaic industry restructuring, stabilizing module prices and prompting European developers to adjust their procurement strategies.

In a new weekly update for pv magazine, OPIS, a Dow Jones company, provides a quick look at the main price trends in the global PV industry.

News from the photovoltaic and storage industry: market trends, technological advancements, expert commentary, and more.

Polysilicon prices in China have continued to stabilise, with no significant fluctuations over the past month.

SMM brings you current solar photovoltaic equipment or material prices and historical price charts such as polysilicon prices, silicon wafer prices, battery cell prices, module prices, silicon ...

Such a low price has taken insiders by surprise. InfoLink's price monitoring shows that the prices of n-type TOPCon mono modules used in China's PV projects ranged from ...

IRENA presents solar photovoltaic module prices for a number of different technologies. Here we use the average yearly price for technologies ...

IRENA presents solar photovoltaic module prices for a number of different technologies. Here we use the average yearly price for technologies "Thin film a-Si/u-Si or ...

Over the long term, the major factor driving the global solar PV market is the declining cost of solar PV

module prices. This, in turn, is likely to ...

In a new weekly update for [pv magazine](#), OPIS, a Dow Jones company, provides a quick look at the main price trends in the global PV industry.

Cell transaction prices continue to collapse, with some prices seemingly unavailable for quotation.

InfoLink Consulting provides weekly updates on PV spot prices, covering module price, cell price, wafer price, and polysilicon price. Learn about photovoltaic panel price trends ...

SMM brings you current solar photovoltaic equipment or material prices and historical price charts such as polysilicon prices, silicon wafer prices, battery ...

The latest round of price surges in the solar PV value chain has caused PV module prices in China to exceed RMB2/W (US\$0.30c/W).

China's latest tender results show the spot price of n-type modules increasing from RMB0.7/W to as much as RMB0.75/W.

Discover data on Photovoltaic: Price in China. Explore expert forecasts and historical data on economic indicators across 195+ countries.

The PV Module Price Index tracks wholesale pricing and supply of crystalline-silicon modules that have fallen out of traditional distribution ...

Some distributors told PV Tech that suppliers messaged them that some PV module manufacturers are considering increasing prices.

PV Price Trends Through detailed survey cross-survey of data from major suppliers and procurement parties, Green Energy Research is able to ...

If you don't know how much is solar panel price Philippines, this article will guide you how much are solar panels in Manila, Cavite, Pampanga, Bulacan, etc.

Nowhere is this more evident than in the Chinese solar supply chain, where China dominates the process of converting raw silica into PV modules. The country produces 83% of the world's ...

Over the long term, the major factor driving the global solar PV market is the declining cost of solar PV module prices. This, in turn, is likely to have a positive impact on the ...

High electricity market prices have reinforced the competitiveness of PV and several countries have acted

policies to further accelerate PV in line with EU and national energy sovereignty ...

Taiwan-based research firm EnergyTrend says market optimism in China has driven up solar module prices, while production of modules, cells, ...
