

Cuba solar power home brand

Is there a problem with solar power in Cuba?

Another hurdle for the expansion of solar power in the residential sector lies in the electricity tariff subsidy, which is charged in a devalued currency. According to official figures, around six percent of the more than four million households in Cuba consume more than 500 kilowatt hours (kWh) per month.

Why is Cuba importing portable generators?

A man starts up a gasoline-powered generator in the town of Batabanó, Mayabeque province, Cuba. The country's energy problems have fuelled the importation of portable generators in the face of the frequent power cuts caused by the energy crisis in this Caribbean island nation. How does Cuba generate electricity?

About 95 percent of Cuba's electricity generation relies on fossil fuels, which include the natural gas produced with domestic oil, offshore oil rigs leased from Turkey, as well as diesel and fuel oil based generators and engines.

Are solar panels a good investment?

"Solar panels are the best, there is no fuel cost or noise. But they need to be sold with real incentives in order for more people to invest in them," entrepreneur Félix Morffi, 86, a former mid-level technician in machinery and tool repair and a tenacious advocate of clean energy opportunities, told IPS.
