Is there a problem with solar power in Cuba?

Another hurdle for the expansion of solar power in the residential sector lies in the electricity tariff subsidy, which is charged in a devalued currency. According to official figures, around six percent of the more than four million households in Cuba consume more than 500 kilowatt hours (kWh) per month.

How many solar parks will Cuba have in 2028?

Cuba will have 55 new photovoltaic solar parks in the course of next year, Foreign Minister Bruno Rodríguez said on Thursday. According to the national energy transition strategy, the installation of 92 parks is planned until 2028 to provide more than 2,000 megawatts (MW) of power, the foreign minister noted on X.

Could solar panels be a solution to the energy crisis?

Large consumers in the residential sector could find in the installation of solar panels a way to offset the amount of their energy bill through cogeneration for self-consumption or receive a payment for injecting clean energy into the national power grid. CREDIT: Jorge Luis Baez / IPS

How does Cuba generate electricity?

About 95 percent of Cuba's electricity generation relies on fossil fuels, which include the natural gas produced with domestic oil, offshore oil rigs leased from Turkey, as well as diesel and fuel oil based generators and engines.

Are solar panels a good investment?

"Solar panels are the best, there is no fuel cost or noise. But they need to be sold with real incentives in order for more people to invest in them," entrepreneur Félix Morffí, 86, a former mid-level technician in machinery and tool repair and a tenacious advocate of clean energy opportunities, told IPS.
