

Danish inverter cabinet manufacturer

How much power does a Nord inverter have?

NORD Inverters for control cabinet installation have a power range of up to 160 kW and thanks to their wide range of functions can be perfectly adapted to all of the customer's applications.

How much power does a control cabinet inverter have?

Our inverters for control cabinet installation have a power range from 0.25 to 160 kW and can be extended with optional plug-in modules. Variable cooling concepts ensure optimum heat dissipation. Why Inverters for control cabinet installation from NORD?

Why should you choose a nordac pro inverter for control cabinet installation?

High performance with safety: NORD inverters with STO and SS1 We have equipped our NORDAC PRO inverters for control cabinet installation with extensive safety functions. The Safe Torque Off (STO) function switches off the motor torque, e.g. to prevent accidental starting or to initiate an emergency stop.

Which frequency inverters are suitable for control cabinets?

We have developed the NORDAC PRO family of frequency inverters especially for installation in control cabinets. These inverters are equally suitable for operating synchronous and asynchronous motors and meet all conceivable customer requirements thanks to a wide range of options.

Are Nord frequency inverters energy efficient?

NORD Frequency Inverters already meet the requirements of energy efficiency classification IE2 of the new Ecodesign directive (EU) 2019/1781 (valid from 1st of July 2021). NORD inverters are the solution for drive tasks in numerous applications installed all over the world.
