

What types of greenhouses does Danish Horti supply build?

Danish Horti Supply builds all types of greenhouses to match your needs. We are experts in adapting new and old greenhouse plants that are to be merged together. No task is too big or too small. For example, Danish Horti Supply builds Venlo houses with a span width of 2,3, or 4 meters and with a height from 4.5 to 6 meters - or as you desire.

Does Denmark have a strong focus on securing sustainable biomass?

There is a strong focus on securing sustainable biomass in Denmark. The world's top innovators in wind energy include the Danish company Vestas and Siemens Gamesa, which has Danish roots. Together these two companies had a share of almost a third of global wind turbine installations in 2018, according to GlobalData (preliminary results).

Why do we use steel constructions made in Denmark?

We always use steel constructions produced in Denmark, because we want to ensure the quality of the weldings. At Danish Horti Supply you can feel confident that your plant is built for local wind and weather conditions, because all constructions have been tested in the Casta program.

Who can buy and sell solar panels?

With DanSolar, you get a strong and highly experienced solar cell supplier. In principle, anyone can buy and sell solar panels, but only a few can configure systems like DanSolar and offer turnkey contracts in connection with the design, setup, assembly and installation of both ordinary systems and solar parks.

How do Danish power plants work?

Many Danish power plants are switching from fossil fuels to biomass (wood pellets, wood chips, or straw). Nearly two-thirds of the Danish households are supplied with district heating (heat networks), where the heat is distributed to citizens as hot water in pipes.

What makes a Drivadan greenhouse special?

Drivadan's special construction of steel, aluminum, and glass - including safety glass - provides not only durability but also flexibility. You are not bound by standard sizes; a Drivadan greenhouse can be customized to the exact length, width, and height that fits your garden and your needs.
