Who is universal solar direct?

Sustainable, Reliable & Affordable Energy! Welcome to Universal Solar Direct, your premier provider of customized solar energy for residential and commercial solutions. At Universal Solar Direct, we understand the value of owning your own solar panel system, which is why we are dedicated to providing cost-effective and energy-efficient solutions.

What is direct solar unlimited?

Sign up for the Direct Solar Unlimited plan and get rewarded for the extra energy your solar panels produce. Get unlimited bill credits for the excess energy from your solar panels. Must have solar panels to qualify. Gives you bill credits for all excess energy generation produced by your solar system and returned to the grid.

What is a direct solar system?

A direct solar system is much easier to build than an autonomous system with batteries, but it often requires modifications on the appliance side. Some devices can be connected directly to a solar panel: it is enough to connect the positive and negative contacts of the solar panel and the device.

Who is a pioneer of direct solar power?

To answer that question, we look at a pioneer of "direct solar power": the Living Energy Farm. This environmental education community in the US state of Virginia is completely "off-the-grid" thanks to solar power, but only 10% of the solar power generated passes through a (nickel-iron) battery.

Why should you choose universal solar direct?

When you choose Universal Solar Direct, you can enjoy a range of benefits that include customized solar energy solutions, top-quality solar panel systems, and energy-efficient products, expert installation services, affordable investment programs, and exceptional customer service. Explore All Features!

Why is direct use of solar power important?

Moreover, direct use of solar power avoids the charging and discharging losses caused by batteries, or the energy losses in the transmission infrastructure for grid-connected systems. Both have to be offset by additional solar panels.
