

# Does Lithuania need base stations for communications

When will 5G be available in Lithuania?

Intensive development of 5G base stations is planned throughout 2023. The focus will be on the northeastern Lithuania, where all base stations are planned to be updated with Ericsson network equipment. By mid-summer 2023, Telia Lietuva 5G connection will cover 99 percent of Lithuania's territory. 5G devices and plans

How is Lithuania preparing for a 5G era?

In terms of infrastructure, Lithuania has committed EUR75 million to construct communication towers and install fiber optic lines, striving for 95% of households to have access to these high-speed Internet services by 2025. Additionally, the Ministry of Transport and Communications is guiding the country's 5G advancements.

What is Telecommunications in Lithuania?

Telecommunications in Lithuania include internet, radio, television, and telephony. The Communications Regulatory Authority of the Republic of Lithuania (RRT) functions as the independent regulator for the country's electronic communications industry.

Should Lithuania host a US military base?

Politicians say it should help the country get more attention from Washington. Lithuania will also strive to host a permanent US military base, they insist. US battalions of approximately 500 troops have been rotating to train in Lithuania since 2019. Between 2014 and 2017, company-size units of around 200 US troops were stationed in Lithuania.

What frequencies does 5G use in Lithuania?

5G communication operating in Lithuania uses 3.5 GHz and 700 MHz frequencies. Devices in the 3.5 GHz frequency coverage area will be able to reach speeds of up to 2 gigabits per second (2 Gbps). Where 3.5 GHz can't reach, devices will automatically use the wide coverage 5G connection in the 700 MHz frequency band.

Does Telia Lietuva support 5G?

Telia Lietuva customers can use the 5G network without any additional fees - all they need is a "5G payment" plan and a device that supports 5G in Lithuania. Among the 5G-enabled smartphones, the most popular are those from Apple, Samsung, Xiaomi, OnePlus and other smart devices.
