

At least nine European countries, including Germany, have reduced VAT rates on solar panel sales and installation. This should result in ...

The European Union's expansion of solar energy is on track for its first annual slowdown in more than a decade, industry data showed today, as ...

The EU has doubled its solar capacity in the last three years. How have subsidies made this possible, what support is still available, and what ...

Discover the best solar panels for 2025 in Europe with our concise guide, covering key trends, technology, and product recommendations for smart ...

2025 will be the first time in over a decade that solar power additions decline in the EU, largely due to waning rooftop installations.

In February 2024, the EU institutions agreed in principle on the Net-Zero Industry Act (NZIA), with the aim of supporting domestic manufacturing of clean technologies, such as solar PV, as ...

All you need to know about importing solar panels from China to the European Union: the EU tariffs, importer's obligations, requirements, and more.

Solar PV power capacity additions in the EU 2020-2024, by segment Distribution of solar photovoltaic capacity additions in the European Union in 2024, by segment

At least nine European countries, including Germany, have reduced VAT rates on solar panel sales and installation. This should result in a direct price reduction for consumers ...

In 2023, the EU imported EUR19.7 billion worth of solar panels, EUR3.9 billion of liquid biofuels, and EUR0.3 billion worth of wind turbines from extra-EU ...

A larger European PV manufacturing industry has the potential to provide lucrative employment and advance technological leadership. More importantly, in-house PV manufacturing would ...

For the European solar boom is in truth a repackaged Chinese one: 95% of modules installed in the EU are imported from the world's dominant producer, which can churn ...

The EU has doubled its solar capacity in the last three years. How have subsidies made this possible, what support is still available, and what still needs to happen?

As part of energy policy, the Commission adopted an EU Solar Energy Strategy to accelerate the roll-out of renewables.

Europe's solar energy industry achieved remarkable milestones in 2024, marking a record-breaking year for generation and capacity expansion. Solar energy continues to play a ...

In 2023, the EU imported EUR19.7 billion worth of solar panels, EUR3.9 billion of liquid biofuels, and EUR0.3 billion worth of wind turbines from extra-EU countries, according to the ...

BRUSSELS/BERLIN, July 24 (Reuters) - The European Union's expansion of solar energy is on track for its first annual slowdown in more than a decade, industry data showed on Thursday, ...

In this context, this Policy Brief evaluates specifically the case of solar PV manufacturing. We start by describing the characteristics of solar PV ...

The unprecedented EU Solar Strategy aims to provide the right framework to massively deploy solar PV energy in Europe, and sets out new objectives of almost 320 GWac (400 GWdc) by ...

In this context, this Policy Brief evaluates specifically the case of solar PV manufacturing. We start by describing the characteristics of solar PV supply chains, and then ...

Solar panels can and should be recycled, addressing a growing waste management challenge as Europe's first generation of installations ...

The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

With the European Union goal of achieving 42.5% renewable energy in its power mix by 2030 - which entails an acceleration of the PV ...

The research highlights the rapid growth of solar energy sector and its implications for waste management, stressing the importance of Extended Producer Responsibility ...

BRUSSELS/BERLIN, July 24 (Reuters) - The European Union's expansion of solar energy is on track for its first annual slowdown in more than a decade, ...

The EU solar PV market is expected to experience its first contraction since 2015 this year, declining by 1.4%

EU purchases solar panels and photovoltaic panels

to 64.2 GW of installations ...

In February 2024, the EU institutions agreed in principle on the Net-Zero Industry Act (NZIA), with the aim of supporting domestic manufacturing of clean ...
