

Flywheel Energy Storage System Purchase

Why should you use flywheel energy storage?

This is inefficient and wastes energy. Our flywheel and battery energy storage systems capture, optimise, and reuse energy across a wide range of applications and industries. We founded Flybrid Systems in 2007 to increase the efficiency of Formula One cars using flywheel energy storage technology.

What is flywheel technology?

Flywheel technology is a method of energy storage that uses the principles of rotational kinetic energy. A flywheel is a mechanical device that stores energy by spinning a rotor at very high speeds.

Why do we use flywheels?

By providing multiple cycles of kinetic energy without chemical degradation, our flywheels are uniquely suited to support the transition from fossil fuels to sustainable renewable generation. If playback doesn't begin shortly, try restarting your device.

How can a flywheel bridge the gap between renewables and traditional energy?

As the energy transition and electrification develop, companies and utilities are looking to bridge the gap between traditional energy generation and renewables, which are seasonal and unpredictable. Amber Kinetics flywheels provide firm power from intermittent renewable energy to meet industry and community requirements.

What is rotorvault's flywheel system for grid-scale energy storage?

RotorVault's Flywheel System for grid-scale energy storage lets you harvest energy efficiently and deliver it when it counts. Innovative combination of steel alloys and topological optimization of the flywheel shape. Boosting renewable energy use and cutting emissions by optimizing storage & reducing reliance on fossil fuels.

What is a Nova spin flywheel battery?

Nova Spin, our flywheel battery, stores energy kinetically. In doing so, it avoids many of the limitations of chemical batteries. It can charge and discharge 10x faster, its performance isn't affected by temperature, and it's manufactured using widely available materials. Nova Spin offers a number of advantages for grid operators.
