

The Greek Ministry of Energy and Environment released an updated version of the timetable for renewable electricity auctions.

The expansion of solar and wind energy projects, including the rapid growth of offshore wind initiatives, is set to increase capacity by over 12GW by 2030. Additionally, efforts are underway ...

Greece is well placed geographically to act as a conduit for Europe, the East and West with respect to energy. In addition, as a direct result of Greece's geographic nature, there is ...

Greece's Ministry of Environment and Energy has introduced the updated National Energy and Climate Plan (NECP), which outlines the ...

Akuo Energy is an Independent Power Producer (IPP) specializing in developing, financing, constructing, and operating renewable energy power plants, primarily solar, wind, ...

Renewable energy on islands provides an excellent opportunity for economic development in Greece taking into account that the islands of the Aegean sea are characterized by a ...

A hybrid energy project on the Greek Aegan island of Tilos uses 2.88MWh of battery storage and demonstrated how the island could reach ...

Greece 2030 revised renewable energy goal is now set at 28 GW plus 7 GW of storage, according to the Energy and Environment minister.

These resources support everything from large-scale wind and solar installations to energy storage systems and grid modernization projects. The availability of EU funding ...

Developed by Eunice Energy Group, one of the leading renewable energy companies in Greece, Tilos' new green energy system combines solar ...

In addition, technological developments in renewable energy production, energy storage, electrical mobility and heating give Greece, for the ...

Greek islands are attracting significant investments in renewable energy. But switching to renewable energy is a challenge for islands whose ...

Greece offers strong renewable energy investment opportunities in solar, wind, and storage with EU support.

SunMind develops, installs, finances and operates renewable energy assets across the wind, solar and energy storage segments. Last year, the company inaugurated a ...

This study explores the challenge of achieving water and energy self-sufficiency in isolated regions through the design a hybrid renewable ...

Tilos became the first Greek island to approach energy self-sufficiency when a smart renewable energy microgrid and battery was installed in 2017. An initial attempt had ...

Greece's Ministry of Environment and Energy has introduced the updated National Energy and Climate Plan (NECP), which outlines the country's strategy to achieve specific ...

Download SeeNext's analysis of the renewable energy industry in Southeast Europe here. Also in Romania, Helleniq Renewables has agreed to acquire Helios and Wind ...

Imagine this: Greece, the land of ancient myths, is now writing a new legend in renewable energy storage. With solar panels popping up like olive trees and wind turbines ...

Greek islands are attracting significant investments in renewable energy. But switching to renewable energy is a challenge for islands whose grids are isolated from the ...

TILOS is a European project on the Greek island of Tilos that demonstrates the potential of local small-scale battery storage systems to integrate with renewable energy ...

Greek islands face unique energy challenges due to isolation from the mainland grid. This creates opportunities for innovative renewable solutions, including battery storage ...

The kilowatt-class wind turbines begin to turn, and the Greek island of tillos will become the first island in the Mediterranean to rely entirely on wind and solar power. The sea horse- A Greek ...

In recent years, Greece has significantly increased its renewable energy (RES) production and consumption, hitting a record high in 2023 in wind, solar and hydroelectric ...

Issuance of the Offshore Wind Parks National Development Programme The development of offshore wind parks (OWPs) is a national ...
