What is a 6kW GE inverter?

The 6kW General Electric (GEP6.0) inverter is a single phase, grid-tie string inverter that features up to 3 MPPTs with a maximum 16A input current per string. Designed for residential use, this GE inverter is easy to install and ensures maximum safety...

How much power does a 6kW string inverter generate?

This 6kW string inverter kit requires up to 345 square feet of space and generate 400 to 1,000 kilowatt hours (kWh) of alternating current (AC) power per month. Not bad when you consider that the average American household averages 920kWh per month! Actual power generated will vary based on location, equipment and installation factors.

Are string inverters a good option for home solar?

When powered by full sunlight, string inverter systems are a cost-effective solution for home solar installations. An unobstructed south-facing view of the sun will maximize your solar power. If your system is partially shaded by trees, chimneys or other obstructions, the string inverter output will drop along with the output of the whole system.

Do Genetry solar inverters have AC input switching?

Contact us for more details! Yet another industry-first available on Genetry Solar inverters is the automatic AC Input switching function. This is a highly valuable feature for RV customers who may go from a 240v shore connection one day to Grandma's 120v extension cord the next day!
