

Huawei Myanmar Power Storage Vehicle Brand

Does Myanmar have an electric vehicle industry?

Once in its infancy, Myanmar's electric vehicle (EV) industry is steadily developing. The National Level Electric Vehicle and Related Industry Development Steering Committee released an updated list featuring 87 licensed companies as of May 2025.

Does Huawei have a relationship with EV manufacturers?

They all have underlying Huawei solutions. Huawei's relationship with EV manufacturers is vast: its solutions have been implemented in 10 models, and four vehicle manufacturers have a deep integration with their systems.

Is Myanmar a hotspot for electric mobility?

This development provides a clear indication of interest for foreign investors: Myanmar's EV market is no longer nascent. With clear regulatory frameworks, increasing private sector participation, and government support, Myanmar is fast becoming a regional hotspot for electric mobility and supporting industries. Newly Joined Companies in 2025

Why is Huawei developing a solid-state battery?

Huawei's design aims to boost safety and cycle life by mitigating degradation at this critical junction. Huawei's involvement in solid-state battery research reflects a broader trend among Chinese technology and automotive companies. While Huawei does not manufacture power batteries, it has shown increasing interest in upstream battery materials.

Will Shangjie Smart cars boost the production of smart cars?

The companies even announced the new brand at the Auto Shanghai 2025. Now, both parties aim to boost the production of Shangjie smart cars. According to the reports, Huawei and SAIC are now penning agreements with the Lingang New Area to create a new line of energy vehicles (EV) and battery plants to power them.

Does Huawei make power batteries?

While Huawei does not manufacture power batteries, it has shown increasing interest in upstream battery materials. Earlier in 2025, the company filed a separate patent on the synthesis of sulfide electrolytes -- a key material known for its high conductivity but also high cost, sometimes exceeding the price of gold.
