China's Huawei Technologies Co Ltd has clinched a deal to supply 110 MW of photovoltaic (PV) inverters for a solar project in Greece.

In the heart of Greece, specifically in Kilkis, a 3.3 MW photovoltaic system has recently been completed, marking an important step toward energy sustainability.

By utilizing fixed tilt structures, Huawei inverters, and CHINT panels, Koukouvagia optimizes solar energy capture and efficiency, supporting Greece's transition to a low-carbon economy.
