

Indoor base station power supply

What are the components of a base station CB system?

Remember, the longer the CB antenna, the more potential range that you will have. The basic components for a Base Station CB System include a CB radio, power supply (if you are using a mobile CB radio instead of a base station CB radio), coax, and an antenna.

Which base station Radio will plug directly into my wall outlet?

We have selected the Galaxy DX2547 first, as this is the only base station radio that we offer that will plug directly into your wall outlet. You can choose to get a mobile CB radio, like the DX959B, but will require an additional power supply.

What is a base station & how does it work?

A base station is generally a radio system that is set up in a fixed location such as house or building. Since a fixed location allows one to install a much taller antenna than an antenna on a vehicle, you can get significantly more potential range. Remember, the longer the CB antenna, the more potential range that you will have.

What size base station antenna do I Need?

Here are some of our base station antenna recommendations: PROTON99 - 18 Foot Antenna PATRIOT - 12 Foot Antenna SATURN - 39 Inch Antenna. If you are looking for an indoor base station antenna, check out the IBA5. Please note that this will not perform as well as an outdoor base station antenna. Always remember to tune your CB antenna!

How do I connect my mobile CB radio to my power supply?

The power supply is plugged into your wall outlet and your mobile CB radio will be connected to the power supply. This is generally cheaper than selecting the Galaxy DX2547 even though you would be purchasing two products (mobile CB radio and power supply) instead of one product, the DX2547. We have selected the DX959 and PS12 for this kit.

How do I find a good power supply?

Searching for a power supply? Choose from our ample selection of quality DC power supplies from popular, name brand manufacturers to amply handle the load! Ordered and had them tune Gmrs antenna and working great. Highly recommend Fine, very satisfied, but the real test will be the speed of delivery. Products clearly detailed and easy to find.

Never run out of power again with the best portable power stations out there, tried and tested by our experts.
