

Jamaica Power Generation Container

How can energy services companies improve energy use in Jamaica?

There are huge opportunities for increasing the efficiency of electricity use in Jamaica, particularly using an Energy Services Company (ESCO) framework. ESCOs are Energy Services Companies who bundle a number of energy services to form an energy saving project.

Is coal an option for electricity generation in Jamaica?

Yes, coal, a relatively cheap form of energy is included in the National Energy Policy as an option for electricity generation in Jamaica. Cognizant of the additional cost with associated externalities, strict environmental guidelines will accompany coal fired generation projects, if approvals were to be given.

Where can I find information about the electricity sector in Jamaica?

The National Energy Policy 2009-2030, the Electricity Act 2015, the Petroleum (Quality Control) Act 1990 and the Jamaica Public Service Company Limited - Electricity Licence 2016 provide guidance to investors on the electricity sector. You may obtain further information on these documents at following link:

Does Jamaica have a monopoly on electricity?

This is a list of electricity-generating power stations in Jamaica, sorted by type and name. In Jamaica, the Jamaica Public Service Company (JPS) has a monopoly on the "transmission, distribution and supply of electricity". However, JPS does not have a monopoly on electricity generation.

What is happening in Jamaica's energy sector?

Jamaica's energy sector is dominated by relatively old and inefficient infrastructure that are now being prioritized for modernization and or replacement. Aged electricity generating plants and hydro skimming refinery technology are scheduled to be replaced and or upgraded respectively.

What is Jamaica's electricity generating mix?

According to the MEM (2009), in 2008 Jamaica's electricity generating mix consisted of 95 percent petroleum and 5 percent renewables. This mix is expected to change markedly by 2015 when petroleum is expected to represent 67 percent, natural gas 15 percent, petcoke/coal 5 percent, renewables 12.5 percent and others 0.5 percent.
