How big is the power bank market?

The Power Bank Market size is estimated at USD 20.10 billion in 2025, and is expected to reach USD 29.59 billion by 2030, at a CAGR of 8.04% during the forecast period (2025-2030). The power bank market is demonstrating robust growth, driven by the increasing dependence on portable electronic devices such as smartphones, tablets, and laptops.

Why is the power bank market growing?

The power bank market is demonstrating robust growth, driven by the increasing dependence on portable electronic devices such as smartphones, tablets, and laptops. The growing prevalence of remote work, outdoor activities, and travel has escalated the demand for efficient and reliable charging solutions.

Who makes the best power bank products?

The power bank market is semi-consolidated, with an array of products. However, major vendors such as GooXiaomi Corporation, Lenovo Group Limited, Panasonic Corporation, Koninklijke Philips NV, Sony Corporation, and many more are highly preferred power bank product providers across various applications in different countries.

What factors affect the power bank market?

The proliferation of counterfeit and low-cost power banks affects market credibility and reduces sales of genuine, quality products. Macroeconomic factors significantly shape the dynamics of the power bank market. When the economy thrives, consumers have more purchasing power, boosting demand for electronics, power banks included.

Why are power banks becoming more eco-friendly?

Moreover, with rising environmental concerns, the demand for sustainable and eco-friendly power solutions is surging. Power banks are joining this green revolution as manufacturers seek to lessen their environmental footprint. They're turning to recycled materials, biodegradable components, and advanced battery technologies.
