

Melbourne solar 5kw photovoltaic panel price

How much does a 5kw Solar System cost in Melbourne?

The average 5kW solar PV system in Melbourne currently costs roughly \$1.42 per watt (W), working out to about \$7,200 in total after the federal incentive and GST are taken into account. System prices may be higher or lower, depending on the company offering the system and the components used.

How much does a solar PV system cost in Melbourne?

To give you a rough idea, the solar PV system cost Melbourne usually works out at around \$1,000-\$1,400 per kilowatt before rebates. So, say you go for a 6.6 kW system (the most popular size right now), you're looking at somewhere between \$6,600 and \$9,000 before incentives.

How much does a 5kw Solar System cost?

A 5kWh solar panel system will cost you between \$5,719 and \$6,524 installed [2 - 3]. The average price for a 5kw system in 2025 is \$6,284. This is the price after the solar rebate has been applied. Rebates are claimed by your installer so this is the final amount you will need to pay.

How much does a 6.6kw Solar System cost in Victoria?

A top-quality 6.6kW solar system in Victoria starts at around \$7,920, fully installed. From there, you can potentially get a \$1400 rebate from Solar Victoria and a \$1400 interest-free loan. In Melbourne, an unshaded 5kW solar system facing north should average around 18kWh a day, while a 6.6kW system should output up to around 24kWh a day.

How long does a 5kw Solar System last in Australia?

On average, solar system costs have fallen across Australia over the past 10 years or so. SolarQuotes estimates that going solar with a 5kW system means a payback period of four years and 11 months. Again, this will depend on all the factors previously discussed, and whether your plan is to rent the property out or live there yourself.

How long does a 6.6kw Solar System last in Melbourne?

A typical north facing 6.6kW system in Melbourne can payback within 4 - 6 years. However, a 6.6kW system may not necessarily be the most suitable for your household. There are also several variables specific to your property and electricity consumption habits that will affect the payback of a solar system.
