

Mobile three-level power box with built-in power supply on construction site

What is a construction box?

Also called construction boxes, they have: Single-phase or three-phase power sources: Phase refers to how power supplies distribute electricity. Single-phase 120/240V construction boxes can accommodate smaller power needs, while three-phase 208Y/120V and 480Y/277V boxes will handle larger loads. Need more power? For maximum output, try a 600V box.

How many volts can a construction box handle?

Single-phase 120/240V construction boxes can accommodate smaller power needs, while three-phase 208Y/120V and 480Y/277V boxes will handle larger loads. Need more power? For maximum output, try a 600V box. Multiple input and outlet options: Construction boxes have numerous distribution options, including panel mounts, receptacles and flanged inlets.

What is a power distribution box?

Compared to other temporary power solutions, a power distribution box provides utility, safety and efficiency at an affordable price. Also called construction boxes, they have: Single-phase or three-phase power sources: Phase refers to how power supplies distribute electricity.

Can ETEC Powerbox be used on construction sites?

Optionally, the ETEC Powerbox can be equipped with an integrated DC fast charger with a charging capacity of up to 200 kW charging power allowing electric machines to be recharged at lightning speed. The ETEC Powerbox excels in versatility, reliability, and sustainability. It offers much more than just power on construction sites.

What is a temporary power distribution box?

Temporary power distribution boxes are a budget-friendly way to supply electricity to a remote area. You can use them to power electrical equipment, lighting systems and more. Compared to other temporary power solutions, a power distribution box provides utility, safety and efficiency at an affordable price.

What is a PowerBox and how does it work?

With its optional integrated DC fast charger of up to 200 kW, the Powerbox enables ultra-fast charging. This makes it fully prepared for the energy demands of tomorrow: powerful, future-proof, and completely emission-free. The Powerbox can also be combined with a generator, creating a hybrid energy configuration.
