

Myanmar Communication Base Station Wind Power Infrastructure Construction Project

What is Myanmar's first wind power project?

A deal for Myanmar's first wind power project with the participation of a Chinese energy infrastructure company was signed on Wednesday, a major step in bilateral new-energy cooperation, the Chinese Embassy in Myanmar said in a statement released on Thursday.

How Chinese companies are supporting Myanmar's energy supply?

Active role by Chinese companies has already taken place in supporting the country with the much-needed energy supply. Myanmar's first 100-megawatt photovoltaic power generation project, the Jingda Sub-project, funded and developed by Power Construction Corp of China, was connected to the grid on January 18.

Who is developing a new energy project in Myanmar?

Myanmar company Primus Advanced Technologies Limited and Chinese companies, Asia Ecoenergy Development Limited, registered in Hong Kong, and Yunnan Machinery and Equipment Import and Export Co Ltd, will develop the projects.

What is the power cooperation between China and Myanmar?

Myanmar is rich in water, solar, wind, gas and other power resources, and power cooperation between China and Myanmar is highly complementary, he noted. The agreement signed on Wednesday is an important part of the China-Myanmar promotion of the BRI and the construction of economic corridors, Chen said.

Will Chinese companies continue to collaborate with Myanmar?

Ambassador Chen Hai said that Chinese companies will continue to collaborate with Myanmar in the energy sector, and hailed the fact that the Rakhine projects are the first wind energy projects in Myanmar. Another China-backed power project, a power plant in Rakhine's Kyaukphyu Township, started operating in October last year.
