

North Macedonia's photovoltaic reforms benefit solar panels

Can North Macedonia develop solar energy?

The potential for solar energy development in North Macedonia is vast. With estimates suggesting that the country could harness up to 11 GW of solar PV capacity, there is significant room for growth.

What are the benefits of expanding solar energy capacity in North Macedonia?

One of the most compelling benefits of expanding solar energy capacity in North Macedonia is its potential to enhance energy independence. In 2021, approximately 33.2% of North Macedonia's electricity consumption was covered by imports.

Should North Macedonia accelerate the transition to renewables?

Like others in the region, North Macedonia must balance its need to rapidly accelerate the transition to renewables to secure its energy future with the need to ensure that future is one where both the country's nature and people thrive.

How much electricity will North Macedonia produce a year?

This means that if only a half of these priority locations were built out, they could produce 7.7 terawatt-hours of electricity per year--which exceeds North Macedonia's current electricity consumption and could even fully cover the estimated electricity consumption in 2030 under the energy efficient scenario of the NECP.

Why does North Macedonia import electricity?

This shift can be largely attributed to increased investments in photovoltaic projects, which have bolstered local electricity production. Currently, North Macedonia imports electricity primarily from neighboring countries such as Bulgaria, Serbia, Hungary, and Greece.

Does North Macedonia need a coal phase-out?

Even though the country has historically been dependent on lignite coal mining for around 30% and gas imports for an additional 15% of its electricity production, it has nonetheless set very ambitious goals for decarbonization. As part of the Powering Past Coal Alliance, North Macedonia has committed to a coal phase-out by 2027.

Þ North Macedonia has great potential for renewable energy production, as this policy brief shows, in particular clean energy with minimal environmental disruption, such as wind and ...

North Macedonia has drafted the first laws and agreements on strategic investments in the energy sector, a model the country is using to facilitate and speed up ...

North Macedonia is actively developing its solar energy sector. Recently, the government has fast-tracked the

North Macedonia's photovoltaic reforms benefit solar panels

construction of two solar power plants with a total capacity of 155 MW in ...
