

# Outdoor Power Rating

Do outdoor speakers have an IP rating?

If you're looking to install an outdoor speaker system or want to add some outdoor lighting to your patio, you've probably seen that products labelled as "outdoor" have an IP rating attached to them (e.g., IPXX). This complete guide will explain the different numbers, going over what each digit means and what IP rating is required for outdoor use.

What are power output ratings?

Power output ratings are available in terms of wattage. How many watts a device will deliver explains how much power it can produce. The more watts a device can produce, the larger the electrical component it can run. For instance, a 100-watt power supply can power two 50-watt bulbs.

Are outdoor power tools a good purchase?

Learn More > Outdoor power tools aren't a small purchase, so you want to have confidence that you picked the right product the first time. To help you make the right decision for your property, we test everything from chipper shredders to string trimmers, basically just about any type of lawn and garden equipment for any size and type of yard.

Are outdoor sockets safe for power tools?

Outdoor Sockets for Power Tools If you're installing outdoor sockets for using power tools in the garden or driveway, an IP66 rating provides excellent protection against powerful water jets, ensuring safety even during cleaning or heavy rainfall. These sockets typically feature robust gaskets and seals that maintain integrity over years of use.

What is the best portable power station?

The Goal Zero Yeti 1500X Portable Power Station (updated model from the 1000X we tested) remains our favorite thanks to its ample power and potential to supply even more backup power by connecting additional Yeti batteries. Not only can it power tablets, phones, and flashlights, but it also powers appliances and power tools.

Should you use a power station for camping?

If you're using the power station within the home or workshop exclusively as a backup power device, then a lightweight product will be fine. If you're using a power station for camping, consider products that offer water and ultraviolet resistance.
