

Outdoor power supply with controllable charging power

Do portable power stations make camping better?

A good portable power station makes camping better. These devices power lights, phones, and small appliances when you're outdoors. We spent three months testing power stations to find the best portable power stations for camping. We tested 30 portable power stations over 12 camping trips.

What is a portable power station?

Portable Power Station: Engineered with portability in mind, this power station features a convenient handle for easy transportation. Its compact yet robust design makes it the perfect companion for outdoor adventures, camping, indoor use, or during power outages.

How much power does a portable power station need?

For portable power stations, capacity is measured in watt-hours (Wh), telling you how much energy the unit stores. Weekend adventures typically need 200-300Wh for smartphone charging and LED lighting. Glamping and campground camping with amenities require 500-700Wh units to power fans, portable coolers, and CPAP machines.

Why should you buy a portable power station?

Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more.

How many watts of power do you need for camping?

We selected 10 models that each offer at least 1000Wh capacity. While 300-400Wh is enough for basic camping needs, we chose higher capacity units for several reasons. Higher capacity allows longer trips without recharging. It also powers more devices at once, which helps when camping with family or friends.

How do portable power stations work?

Portable power stations have control panels with LED displays and buttons that turn off and on inputs and display usage and remaining power. Most portable power stations are also compatible with Bluetooth and Wi-Fi, allowing you to monitor and control them remotely from a smartphone app.
