Saudi Electricity Co, Iran Power Development Co, Abu Dhabi National Energy Co, Abu Dhabi Power Corp, and The Israel Electric Corporation Ltd are the top 5 power plant owners in the Middle East by capacity as of March 31, 2022. All the companies are based in the Middle East.

How can solar power be deployed in the Middle East?

Solar power can be deployed in the Middle East either at scale for large communities, or in a modular way on rooftops, or for small factories. Experts say solar could help as it is cost-competitive and quicker to install.

Will Iran's new coal plant be powered by locally mined coal?

The billion-dollar plant, which began construction in 2012, will be powered from locally mined coal. Iran's domestic coal production is expected to increase by more than 2 million tons per year when improved coal mining and processing facilities begin operation in 2020, according to Imidou mining representatives.
