Why should American Samoa invest in solar energy?

Positioned less than 1,000 miles south of the equator, American Samoa is uniquely positioned to harness its abundant solar energy resources. BESS projects will be critical for American Samoa to achieve its renewable energy goals by maximizing solar utilization, reducing dependence on imported fuels, and ensuring a safe, reliable grid.

How does a Samoa company work?

A Samoa company must appoint at least one director and one shareholder, who may be the same person or legal entity. Directors are responsible for the company's governance, while shareholders own the company. Details of the directors and shareholders must be prepared for registration, although privacy options exist for offshore entities.
