

Solar Panel Relocation and Upgrade Project

Should I move or reinstall my solar panels?

Working with experts is crucial when moving or temporarily removing your solar panels. Improper removal or reinstallation can lead to performance issues or damage. At Suntrek, we ensure the highest standards are met throughout the solar panel removal service process.

Can you move solar panels from one property to another?

Moving Solar Panels from One Property to Another. What are your Options? As we all know, having a solar system on your roof is a great way to reduce your carbon footprint and save money on your monthly electric bills. For better or for worse, things change and solar people can find themselves moving their home or business.

What is solar panel removal & reinstallation?

Solar panel removal and reinstallation means removing solar panels from the mounting structures, transporting them (if necessary), and installing them again on the same or different roof or surface.

Is it easy to move solar panels?

Surprisingly, moving solar panels isn't as easy as you might think. Without a doubt don't make the mistake of selling your home, and then changing your mind. Your residential or commercial solar panel system will now be considered a fixture and remains with the home or business. So make sure you are taking all of this one step at a time.

How much does a solar panel removal & reinstall cost?

Calculating the price of solar panel removal and reinstallation predominantly relies on your system's size, the complexity of your roof, and the status of any necessary repairs. HomeAdvisor says the average cost to remove and reinstall solar panels is between \$1,000 and \$3,000, depending on the project's complexity.

Does SunTrek reinstall solar panels?
