

# Solar panel inventory companies

What is solar inventory?

Solar Inventory is inventory carried by solar companies and can include: The management of solar inventory comes with some specific challenges which it shares with other highly innovative industries which experience similar demand & price volatility and technological disruption.

How do solar companies manage inventory?

As a solar company, you may have warehouses across the country, each holding a different amount of inventory. Many companies have to manage the complexity of maintaining stock at multiple locations. In the solar industry, the need to keep equipment on individual crew trucks further complicates inventory management.

Why is inventory management so difficult for solar companies?

Inventory management for solar companies can be more complicated than in other industries because of the many influences affecting customers' purchasing decisions. Demand for solar panels changes dramatically based on external factors. Some are similar to many other sectors.

Where can I buy solar panels?

Local solar companies are well-versed with regional regulations and climate conditions, ensuring a smooth and efficient process. For smaller projects, you have several options to buy solar panels: Purchase solar panels through certified solar companies that have deals from top manufacturers. Buy DIY kits available at home electronics online stores.

What are the best techniques for solar inventory management?

The best techniques for solar inventory management are the Reorder point formula, Consignment and Safety Stock. Solar Inventory includes inventory management of solar modules, solar cells, PV materials, solar paste, silicon wafers, frames, backsheets, junction boxes, PV glass, PV Equipment, PV connectors and racking & mounting.

How has the solar industry innovated over time?

The Department of Energy has an excellent resource called the Solar Innovation Timelinewhere you can see how the solar industry has innovated over time. While this innovation has improved the throughout of solar modules and helped bring the price down, it has also created a risk of obsolescence which very much impacts inventory management.
