What are the top solar panel brands in 2024?

February 13, 2024 - Today, SolarReviews released its annual solar panel brand ranking list, and Qcells has been crowned the top solar panel brand for the second year in a row! Details around the ranking list can be found [here](#), but here is a quick snapshot of the top 2024 solar panel brands:

Why should you choose the best solar panel brands?

With the growing demand for renewable energy, solar panel brands have become an essential investment for homeowners, businesses, and industries. Choosing the best solar panel brands ensures high efficiency, durability, and long-term savings. With multiple brands available in the market, making the right choice can be challenging.

Which brands of solar panels are best?

The following brands have been recognized as the top choices for U.S. homeowners looking to install solar panels: 1. Moxon Solar Technologies Moxon is known for its industry-leading efficiency and exceptional 40-year warranty, making it one of the most reliable choices for long-term solar investments.

What are the best residential solar panels?

Qcells has the most innovative residential solar panels on the market and boasts an impressive number of features that put the company's panels above competitors. We like that the maximum efficiency available is 22.5% for residential panels, placing this brand of solar panels at the top in terms of performance.

Which EnergySage solar panel is best?

REC is a longtime favorite among EnergySage shoppers, probably because of its relatively low price per watt and impressive specs. Out of our top brands, REC offers the best bang for your buck: The Alpha Pure 410-watt panel maintains efficiency above 22%, and it has solid 25-year performance and product warranties.

Which REC Solar panels are best?

Out of our top brands, REC offers the best bang for your buck: The Alpha Pure 410-watt panel maintains efficiency above 22%, and it has solid 25-year performance and product warranties. These panels also have one of the lowest temperature coefficients on the market, which means they perform better in hotter temperatures compared to other panels.
