

Solar system home costs in Switzerland

How much does a solar system cost in Switzerland?

A normal solar power system for an average single-family home in Switzerland costs around CHF 15,000 after subsidies and tax savings. The higher the self-consumption and the proportion of solar energy produced in the total energy requirements, the faster the solar system pays for itself.

How much does a Volta Swiss solar installation cost?

Case study of a Volta Swiss solar installation in the Lausanne region: 37.3 m² photovoltaic installation with 10 kW intelligent hybrid inverter and 10 kWh LiFePO₄ storage battery for a 3-person family villa, with air/water heat pump heating system, swimming pool and charging point for hybrid car. Total cost of installation CHF 25,400.00.

Should you invest in a solar system?

The investment costs can also be deducted from taxes in most cantons. Solar power from your own roof is cheaper than power from the public grid. You can permanently reduce your electricity costs by 30%. With your own solar system, you become self-sufficient and are less affected when electricity price increases.

Is solar power cheaper than a public grid?

Solar power from your own roof is cheaper than power from the public grid. You can permanently reduce your electricity costs by 30%. With your own solar system, you become self-sufficient and are less affected when electricity price increases. They generate income by feeding solar power into the grid.

Is a solar roof suitable for a photovoltaic system?

Our Solar Calculator analyzes the profitability of a PV system for you. If the roof is suitable for a photovoltaic system, the question often arises: Is the investment worth it? From a purely ecological point of view, this question can always be answered with a yes.
