

# Switzerland's new hydrogen energy small container station

Where is the first hydrogen filling station in Switzerland?

SOCAR Energy Switzerland opened the first hydrogen filling station on a Swiss motorway, located at Grauholz S&#252;d near Bern. This milestone marks SOCAR's commitment to developing a nationwide network of hydrogen filling stations, promoting sustainable mobility and reducing CO2 emissions.

Are hydrogen stations in Switzerland sustainable?

The network of hydrogen stations in Switzerland has come a long way since its inception in 2016, demonstrating significant growth and a clear commitment to sustainability and innovation.

What are the forecasts for the hydrogen station network in Switzerland?

Looking ahead to 2025, the forecasts for the hydrogen station network in Switzerland are optimistic. The number of stations is expected to double again, reaching approximately 30 operational facilities.

When was the first hydrogen station opened in Switzerland?

The first hydrogen station in Switzerland opened in 2016, marking the start of a new era in the country's alternative fuels infrastructure. This initial milestone was part of a concerted effort to encourage the use of hydrogen vehicles, known for their low emissions and high energy efficiency.

What companies are involved in the development of hydrogen in Switzerland?

Hydrogen Mobility Switzerland: A consortium of companies leading the expansion of hydrogen infrastructure.  
Alpiq: A Swiss energy company that is investing in the production and distribution of green hydrogen.  
H2 Energy: A company dedicated to the development of hydrogen solutions for transport and industry.

What is the future of hydrogen infrastructure in Switzerland?

The hydrogen infrastructure is to be developed along the entire value chain (production, conversion, transport, storage and refueling infrastructure) and Switzerland is to be strengthened as a location for education and innovation through the development of the necessary technologies."

The sparse network of refuelling stations is one of the reasons why hydrogen for cars is not catching on. This is made abundantly clear by a new report.

The new production plant - one of the first in Switzerland - draws its electricity directly from the adjacent hydroelectric power station and uses it to produce CO2-neutral hydrogen from ...

We transport the green hydrogen with a container system "made in Switzerland" to the two AVIA hydrogen refueling stations in St. Gallen and Gossau, where the hydrogen ...

## Switzerland's new hydrogen energy small container station

It includes delivery of hydrogen from large centralized and moderately sized semi-centralized production facilities as well as compression storage and dispensing of hydrogen produced ...

SOCAR Energy Switzerland opened the first hydrogen filling station on a Swiss motorway, located at Grauholz S&#252;d near Bern. This ...

Hydrogen infrastructure Electrolysis plants: The map below gives an overview of water electrolysis plants in Switzerland with a capacity based on publicly available information.

Axpo plans 15 MW capacity The new hydrogen plant will be located near the Wildegg-Brugg run-of-river hydroelectric power station. This power station will also supply the new green ...

The importance of producing hydrogen using renewable energy sources is emphasised for a transition to hydrogen fuel cell vehicles to contribute to greenhouse gas emission reduction ...

Axpo and its partners have started construction of a hydrogen plant in B&#252;rglen. This facility will produce 260 tonnes of hydrogen annually for industrial and ...

Axpo begins construction of a hydrogen plant in B&#252;rglen for an annual production of 260 tonnes aimed at industrial and mobility sectors.

The first swap container filled with 350 kg of hydrogen from the G&#246;sgen production plant has been transported to St. Gallen, where it will be used by AVIA Osterwalder for final tests as part of ...

A Vision for the Future Hydrogen's inclusion in Switzerland's energy strategy marks a significant step toward a sustainable and resilient energy system. By leveraging its ...

Hydrogen stations: There are currently 15 public hydrogen stations in operation. For a complete overview of hydrogen refueling stations in the near abroad and in Europe, see <https://h2.live/> ...

A brand-new hydrogen filling station is now operational in Switzerland. Operated by Agrola, the station only offers green hydrogen that is produced from 100% renewable ...

As revealed, Axpo and its partners launched a new 2 MW plant. Reportedly, it will be located adjacent to the EWA-Energie Uri hydropower plant in B&#252;rglen, which will supply it ...

The first swap container filled with 350 kg of hydrogen from the G&#246;sgen production plant has been transported to St. Gallen, where it will be used by ...

## Switzerland's new hydrogen energy small container station

Used by Hydros spider in a nationwide network in Switzerland, Vernconex is a proven industrial solution for the distribution and on-site storage of hydrogen. ...

Find out all about the network of Hydrogen refueling stations in Switzerland. Learn about its development, distribution and benefits.

With the hydrogen production plant in the canton of Graubünden, Axpo is investing in another key pillar of Switzerland's future energy supply. Driving ...

A network of hydrogen filling stations is intended to create the conditions for an increased use of sustainable hydrogen as a fuel in both passenger and heavy ...

This completely privately financed plant was adapted to the limited space and very strict noise regulations on site and has been supplying the eastern part of Switzerland with up to 300 tons ...

The new production plant - one of the first in Switzerland - draws its electricity directly from the adjacent hydroelectric power station and uses it to produce ...

There are currently 18 refuelling stations for hydrogen vehicles in Switzerland. Another refuelling station is being planned, according to the ...

A brand-new hydrogen filling station is now operational in Switzerland. Operated by Agrola, the station only offers green hydrogen that is ...

Our references for hydrogen refueling stations in Europe and worldwide speak for themselves. From small pilot projects to large-scale infrastructure projects, we ...

As revealed, Axpo and its partners launched a new 2 MW plant. Reportedly, it will be located adjacent to the EWA-Energie Uri hydropower ...

Axpo and its partners have started construction of a hydrogen plant in Bregenz. This facility will produce 260 tonnes of hydrogen annually for industrial and mobility applications.

73 hydrogen filling stations opened in Asia, and 11 in North America, in 2022, according to a review of 130 stations worldwide. More than ever, 45 gas stations were opened ...
