

Taipei 900MW solar power

How much solar power does Taiwan have?

Solar power contributes 15.29 TWh of generation to the Taiwanese grid, accounting for 5.2% of total electric power generation as of 2024. Taiwan has 14.28 GW of installed capacity. Taiwan's goal, in the net-zero roadmap of the country's National Development Council (NDC), is to construct 20 GW by 2025 and 40-80 GW by 2050.

Does Taipei have a solar energy potential?

There is strong solar energy potential in the entire country. Research published in 2022 noted that Taipei has the weakest solar irradiance, but there is still substantial benefit to rooftop solar, especially in the pursuit of an ambitious net-zero goal.

What is Taiwan's solar power project?

According to the press release, the project is intended to help Taiwan meet its energy transition goals for the 21st century while also ensuring adequate power for Google's cloud servers and data centers. The solar power project is expected to supply approximately 1 gigawatt worth of electricity per year.
