Are 3 phase 230v-it (Delta) inverters common in Norway?

Three Phase 230V-IT (Delta) (230p-p) systems are common in Norway, only new installations use 400V TN-S (400p-p, 230p-n). I see many grid-tied inverters have the IT options on three-phase systems, why don't hybrid inverters have the same options? If it is for voltage measurement, can't PE be used for a common 0V reference?

Do three phase inverters need neutral connection?

In most countries, three phase inverters require neutral connection at all times. In some countries, the three phase inverters can be connected to delta grids; in other cases, multiple single phase inverters can be used. Prior to system installation, refer to:

What are the specifications of a 3 phase inverter (Europe)?

71 Technical Specifications - Three Phase Inverters (Europe) (1) SE33.3K model requires a medium voltage transformer. For SE27.6K - when set to Germany Power Factor is limited to 0.9. 73 Provided with the inverter in India only.

Do I need a 3 phase inverter?

you have to have 3 phase and Neutral for incoming power and you get 3 phase and Neutral out from the inverters. If you want full 3 phase control then you need 3 x multi/Quattro inverters; you can connect PV to a single phase, but the outputs from the PV would only go to that one phase's electrical loads.

Can a SolarEdge 3 phase inverter be connected to a 3 wire grid?

In some countries, the SolarEdge Three Phase Inverters can be connected to 220/230 L-L 3-wire grids (inverter CPU version 3.2171 or later is required). If the 3-wire ratings need to appear on the inverter certification label, use inverters with Belgian part numbers: SExxK-BExxIxxxx. Installation without confirmation may void the inverter warranty.

How do you rest a 3 phase inverter on the ground?

To rest the inverter on the ground, lay it on its back, front or side. Use only copper conductors rated for a minimum of 90°C/194°F. For the SE10KUS, SE20KUS, SE33.3KUS three phase inverters where opposite polarity DC conductors are routed in the same conduit, 1000V rated cables must be used.
