

UK Smart Solar System Quotes

Is smart solar UK a good company?

Top rating. Smart Solar UK is a very efficient, knowledgeable company that really knows the solar PV business. They came out to work on my 17-year-old system, and did a marvellous job. Done on time, on budget, and left everywhere tidy and clean.

Who are UK solar panels & battery storage?

As a leading solar panel company specializing in UK Solar Panels and Battery Storage, we prioritize fast exceptional service. We offer no-obligation quotes and strive to secure the best prices on the market for our customers.

Who is smart solar?

Smart Solar team is your PV system experts based in Coventry. Book our free desktop site survey to get started in your solar journey.

Is solar power a good idea in the UK?

The answer is that the UK is more than sunny enough to not only install solar panels, but for them to generate power all year round! Modern solar power works from daylight alone, you don't need direct sunlight anymore. So even on the cloudiest days, you will still see the benefits of solar power! Isn't solar power too expensive?

Should I use smart solar for my next project?

I would highly recommend Smart Solar for your next project and happily use them again should any need arise in the future. Smart Solar UK installed our solar system in December 2023, comprising 9 panels and a 10kWh battery.

How much do solar panels cost in the UK?

Solar panel systems in the UK typically cost between £5,000 and £10,000, depending on size and specifications. ROI depends on factors like energy usage and electricity rates. Many systems pay for themselves within 7-10 years, offering decades of reduced bills and energy independence. What maintenance do solar panels require?
