

UK rooftop photovoltaic panel installation

How do accredited solar panel installers install solar panels in the UK?

Here's a step-by-step guide to the solar PV installation process used by accredited solar panel installers in the UK. Every solar panel installation begins with a detailed site assessment. An accredited installer will inspect your roof's size, condition, pitch, and orientation to make sure it's suitable for a solar panel fitting.

How do I install solar panels on my UK Home?

Not easy to install Here's a quick guide to what's needed to install solar panels on UK homes: An installer should visit to determine if the property is suitable for solar panels. They will look at the size and orientation of the roof to decide the best location and angle for installing panels.

Should you put solar panels on your roof?

Installing solar panels is a great way to lower your energy bills and lower your carbon footprint. You can also sell extra energy you make, making them even more worthwhile. But if you want to put solar panels on your roof, where do you start? Our step-by-step guide will take you through the solar panel installation process from start to finish.

What are roof-mounted solar panels?

Roof-mounted solar panels are simply solar panels that are mounted to your roof. These are the most common types of solar panels installed on domestic properties, as they rarely require planning permission, are cheaper to install than other types of solar panels, and don't take up any space that you might later want to use.

What are the regulations for installing solar panels in the UK?

Whether you're installing on a residential roof or a larger property, let's take a look at some of the regulations for installing solar panels in the UK. Arguably, the most important regulations for those looking to install solar panels on their property are those that consider the placement or positioning of the solar panels.
