

Ukraine ranks first in solar container exports

What are Ukraine's Top 10 exports?

Ukraine's top 10 exports in terms of product category generated over three-quarters (76.8%) of the overall value of Ukrainian global shipments. Ores, slag and ash was the fastest grower among the top 10 export categories, up by 57.3% from 2023 to 2024. In second place for improving export sales were oil seeds via a 19.2% advance.

Why is Ukraine exporting solar energy to Europe?

Outflows are driven by ample renewable production in Ukraine at this time of year, which makes it commercially attractive to sell to EU markets during the day, when the country has surplus solar production. At night, flows tend to reverse, allowing Ukraine to import from Europe when internal production from other sources may be insufficient.

Why are Ukrainian businesses turning to self-consumption solar PV systems?

Following three years of bombardments and damage to its energy infrastructure, Ukrainian businesses are turning to self-consumption solar PV systems to keep the lights on.

Why is Ukraine a major exporter?

Ukraine is also a significant exporter of ores, slag, and ash, which are essential materials for the production of metals and other industrial goods. The country's rich mineral resources make it a major player in the global ore market. 6. Electrical machinery and equipment (HS code 85): \$1.53 billion (3.81%)

What is the Ukrainian export and import dashboard?

The dashboard contains data from 2017 to 2024 according to months and individual categories of goods. It allows the assessment of the volumes of exports and imports of Ukraine by product groups and detailed categories of goods, trade partners for imports and exports. Read detailed instructions on how to use the dashboard below.
