

How has Russia impacted Ukraine's energy grid?

Much of the company's infrastructure has been damaged or destroyed. Russian strikes on Ukraine's energy grid have been so frequent this year that they have knocked out more than half of Ukraine's energy-generating capacity.

Is Ukraine buying energy from the European Union?

On Thursday, Ukrainian authorities said seven employees were wounded and energy infrastructure, including a power station, had been damaged in a major overnight attack. Ukraine is buying energy from the European Union, however, this is not enough to make up the deficit.

Why did Ukraine face an energy crisis in 2024?

In 2024, Ukraine faced an energy infrastructure crisis unprecedented in its national history as a result of sustained Russian military attacks on its power generation facilities and transmission networks, in addition to disconnection from the Russian and Belarusian energy grid.

How important is Ukraine's energy sector?

Ukraine's air defences provided some protection, but the scale of the attack and the resulting disruption highlighted once again the vital strategic importance of Ukraine's energy sector, as well as the ever-present risks to the country's energy supply.

Will the US help Ukraine withstand Russian strikes on energy infrastructure?

Meanwhile, the EU and U.S. recently earmarked a combined \$112 million in energy equipment and building for DTEK, the private Ukrainian power company. The aid is supposed to help Ukraine continue to weather Russian strikes on energy infrastructure, the most recent of which was on Nov. 17.
