

Ukrainian Island Power Ground Base Station

Is Russia destroying Ukraine's energy infrastructure?

Russia has stepped up its bombardment of Ukraine's energy infrastructure. Here is a detailed and interactive map of the country's power stations. Ukraine's power supplies are being targeted by the Russian army, leaving much of the country with no heating throughout a cold winter. (Photo by Ed Ram/Getty Images)

Does Ukraine still have a nuclear power plant?

The Zaporizhzhia plant in southwest Ukraine, Europe's largest nuclear power plant, was occupied by Russian troops and hasn't supplied electricity since September 2022. However, a further three nuclear power plants with seven reactors between them remain operational in the east and south and continue to supply Ukraine with electricity.

Did Ukraine have a power system before the 2022 invasion?

Before the 2022 invasion, Ukraine's power system was interconnected with the Russian and Belarussian grids. Plans had been in place since 2017 to synchronize with the continental Europe system in 2023.

Are Ukraine's power plants being attacked?

The corresponding findings, to which researchers from the Technical University of Munich and the University of Bayreuth also made valuable contributions, have now been published in Joule, a leading journal for energy research. "We've established that practically all Ukraine's large, centralised power plants have been attacked since February 2022.

How much energy can Ukraine generate?

This technical potential is enormous. The researchers estimate that the potential for wind energy is around 180 gigawatts, while for solar energy it's around 39 gigawatts. A total capacity of 219 gigawatts would vastly exceed the generation capacity of 59 gigawatts that Ukraine had at the start of the war.

What happened to Ukraine's heating & natural gas infrastructure in 2022?

Ukraine's district heating and natural gas infrastructure has also been targeted. Since 2022, 18 large combined heat and power (CHP) plants have been damaged or completely destroyed, along with more than 800 boiler houses. Some above-ground natural gas storage infrastructure has been damaged, although underground inventories remain unaffected.
