

What is the tariff for imported lithium battery packs in Benin

Can I import a lithium-ion battery?

However, there may be additional import tax and minimum threshold rules for this item. Please use our Landed Cost Calculator to get a full breakdown of the import duty, sales tax and any additional import charges payable on your import. You can also use our HS Lookup tool to get the full length HS code for your lithium-ion battery.

Which countries import lithium batteries?

The U.S. imports the majority of its lithium batteries from China, Singapore, Israel, Japan, and Canada. There are Section 301 tariffs on lithium battery imports from China. If you're importing lithium batteries from China, you'll need to factor in country specific tariffs when you budget for your goods.

What are China's new tariffs on lithium-ion cells & components?

Starting in 2025, new Chinese tariffs on imported lithium-ion cells and components--especially those used in energy storage systems--have reached levels as high as 104%, according to updated trade filings. This marks a significant increase compared to the average 20.8% rate recorded in 2024.

What happens if you import lithium batteries from China?

At minimum, such imports from China could result in a tariff exceeding 145% ad valorem. This tariff, whatever it may be when you import your lithium batteries, will be added on to Section 301 tariffs. Due to how expensive it is to import from China, you'll either need to budget accordingly or find a supplier in another country.

Are Chinese tariffs affecting the battery market?

The U.S. battery market has entered a period of pricing uncertainty due to expanded battery tariffs. Starting in 2025, new Chinese tariffs on imported lithium-ion cells and components--especially those used in energy storage systems--have reached levels as high as 104%, according to updated trade filings.

Are lithium phosphate and nickel manganese cobalt battery chemistries affected by tariffs?

These tariffs apply to lithium iron phosphate (LFP) and nickel manganese cobalt (NMC) battery chemistries. According to U.S. Energy Information Administration data, the United States is projected to add 18.2 gigawatts of battery storage capacity by the end of 2025. Most of this development relies on imported lithium-ion cells.
